www.shawsofdarwen.com

When Shaws of Darwen was founded in the closing years of the 19th century, we had a vision - to make the finest handcrafted fireclay sinks in the whole of England.

Today, some 120 years on, that vision has been more than realised; Shaws now enjoys, not only a national, but a worldwide reputation for the craftsmanship, quality and durability of our unique artisan products.

We're immensely proud of our heritage, and the fact that our sinks are still handcrafted using time-honoured methods at our premises in the same quiet corner of North West England as they were when we first started out in 1897.

We're also exceedingly proud of our extensive Professional Collection, showcased in this brochure, which has been specifically designed for commercial applications such as schools, hotels, leisure, public buildings and laboratories.

These heavy-duty fireclay commercial products are expertly glazed and fired using state-of-the-art kiln technology, making them extremely robust, antibacterial, and both stain and acid resistant.

Benefits Overview 24

Our Products

Handcrafted to the highest standards at our premises in North West England, using time-honoured methods and state-of-the-art kiln technology, these unique, artisan fireclay products simply exude quality.

Durable, robust and practical, the Shaws Professional Collection represents our commercial offering, designed to provide our customers with products of substance, created to deliver a lifetime of service.

Iconic, timeless, aspirational and tactile, each sink is an original design, handcrafted to give a lifetime of service and pleasure.

Our Process

It takes time to hand-make a Shaws sink, between three to four weeks in total, using traditional techniques that have been passed down from master craftsman to apprentice for well over a century.

Known as 'slip casting', the process begins with a mixture of locally sourced clay and water being poured into porous moulds.

When the newly formed sinks are dry enough, craftsmen remove them from their moulds before getting to work doing what they do best – expertly hand-finishing these artisan products through a process of sponging and 'fettling' to create a smooth surface.

At this stage, the master craftsman proudly imprints his name on the base of his creation, before leaving the sink to gradually dry out for a period of over 40 hours.

Only then are the sinks deemed ready to be prepared with a first coat of glaze, before being glazed for a second time to improve the durability of the product.

Firing in specially designed kilns at temperatures of over 1200 degrees Celsius completes this rigorous process.

Handcrafted for Life

Our Values & Promise

At Shaws, we believe wholeheartedly in delivering on our promise: to make the best handcrafted fireclay sinks in the world, backed up with exceptional customer service. We achieve this by being passionate in all we do, and working to the following set of proud values:

Integrity

We're honest and straightforward in all our dealings with our customers, building relationships that stand the test of time – just like our handcrafted products. When you become a customer of Shaws, we consider you one for life.

Reliability

Shaws has developed a worldwide reputation for reliability that we couldn't be more proud of. For creating beautiful, durable, handcrafted products that are made to provide a lifetime of service.

Dependability

Shaws is a dependable partner, whether your requirements are large or small. We offer fantastic choice, products available from stock, simple trading terms and flexible delivery options. Our dedication to service is second-to-none, resulting in customers who are as committed to us as we are to them.

Durability

All products that comprise the Shaws Professional Collection hold a number of independent industry accreditations for quality and resistance against chemicals and staining.

The **hard-wearing glaze** applied to every Shaws sink has been proven to reduce bacterial colonies of E-Coli and MRSA by 99.99% over a 24 hour period and were classified as Excellent in this area, which makes our sinks ideal for healthcare and school installations.

Each sink is produced using heavy fireclay material; cast, finished and glazed by hand in exactly the same fashion as our domestic ranges, ensuring the sinks are resilient to cracking, chipping and staining, however heavy-duty their usage.

Shaws enjoys an international reputation for quality, durability and integrity.

10 Year
Warranty

Shaws products come with a:
10-year guarantee against staining and fading.
1-year guarantee against manufacturing defects.

For more details see our website.

OUR BELIEFS

Pride & Passion

First and foremost, Shaws is a company that believes wholeheartedly in delivering on **our promise:**

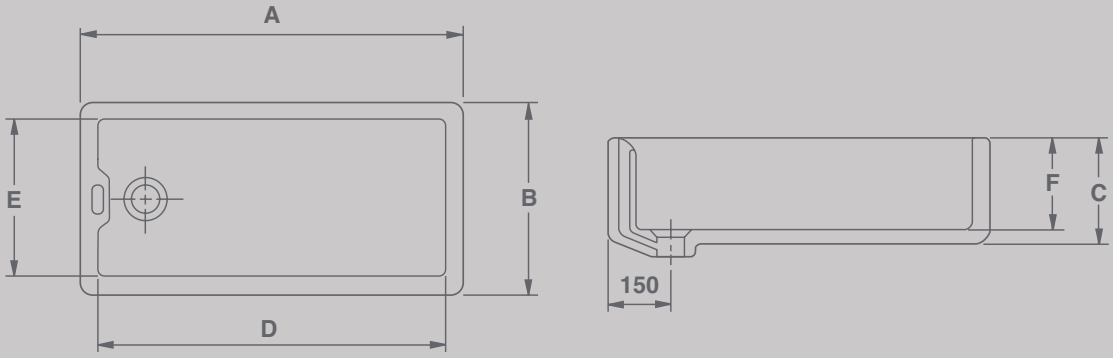

To make the most beautiful, practical, handcrafted fireclay sinks in the world.

We believe in being authentic in all we do, using traditional, time-honoured techniques to produce iconic products that grace the finest establishments and homes the world over.

We believe that our reputation for delivering quality and reliability is as important as producing timeless and elegant design pieces; that's why every Shaws sink comes with a lifetime guarantee.

We believe that every sink that bears the Shaws name should be a thing of beauty, a unique creation, with a charm and character all of its own, bearing testament to the skill and expertise of the master craftsman who lovingly and painstakingly created it.
